

Congreso Mexicano del Petróleo

17 - 20 de noviembre 2021 · Monterrey, N.L.

## “Soberanía Energética con Contenido Nacional”

Mexico City, January 25th, 2021

**Dear Attendee,**

With the greatest interest in safeguarding the health of all participants, in the Organizing Committee of the Mexican Petroleum Congress we have closely followed the progress of the SARS-Cov-2 (COVID 19) pandemic, as well as the provisions of the health authorities.

Given the evolution of this situation and in accordance with the vaccination plan established for our country, it has been decided to postpone our event in order to protect the integrity of all. The new dates have been set from November 17 to 20, 2021. We are sure that advances in vaccination will allow us to hold a safe in-person event and guarantee its success. Likewise, we confirm that the Cintermex venue, located in the City of Monterrey, Nuevo León, will continue to host the Congress.

Based on the recommendations of the World Health Organization, it will be essential to continue limiting social contact and strengthening measures in the coming months to stop the spread of the virus. For the above reasons, we hope they see fit and support the measures followed by the event, in order to take care of the health and guarantee the health safety of exhibitors, sponsors, attendees, organizers, staff and participating authorities.

The CMP is the most important event of the energy industry in Mexico and Latin America, therefore, since 2020, we have held the CMP.ExE Virtual Forums. We invite you to participate in these digital activities developed by industry experts, who provide vital and strategic information for the energy sector.

Through our website, social networks and communications, we will continue to inform you of the dates of each Forum.

Infinitely grateful for your understanding, we remain at your service and with the pleasure of answering all your concerns.

**Attentively**

M.I. Ángel Cid Munguía  
Vice president
